

**I have a closet *full of clothes* and I
still stand in front of it saying I
have nothing to wear.**

HangOn

Wear More. Buy less.

The average garment is
worn only *7–10* times
before it's thrown away.

**Not
because
we don't
love our
clothes.**

**We just
forget what
we own.**

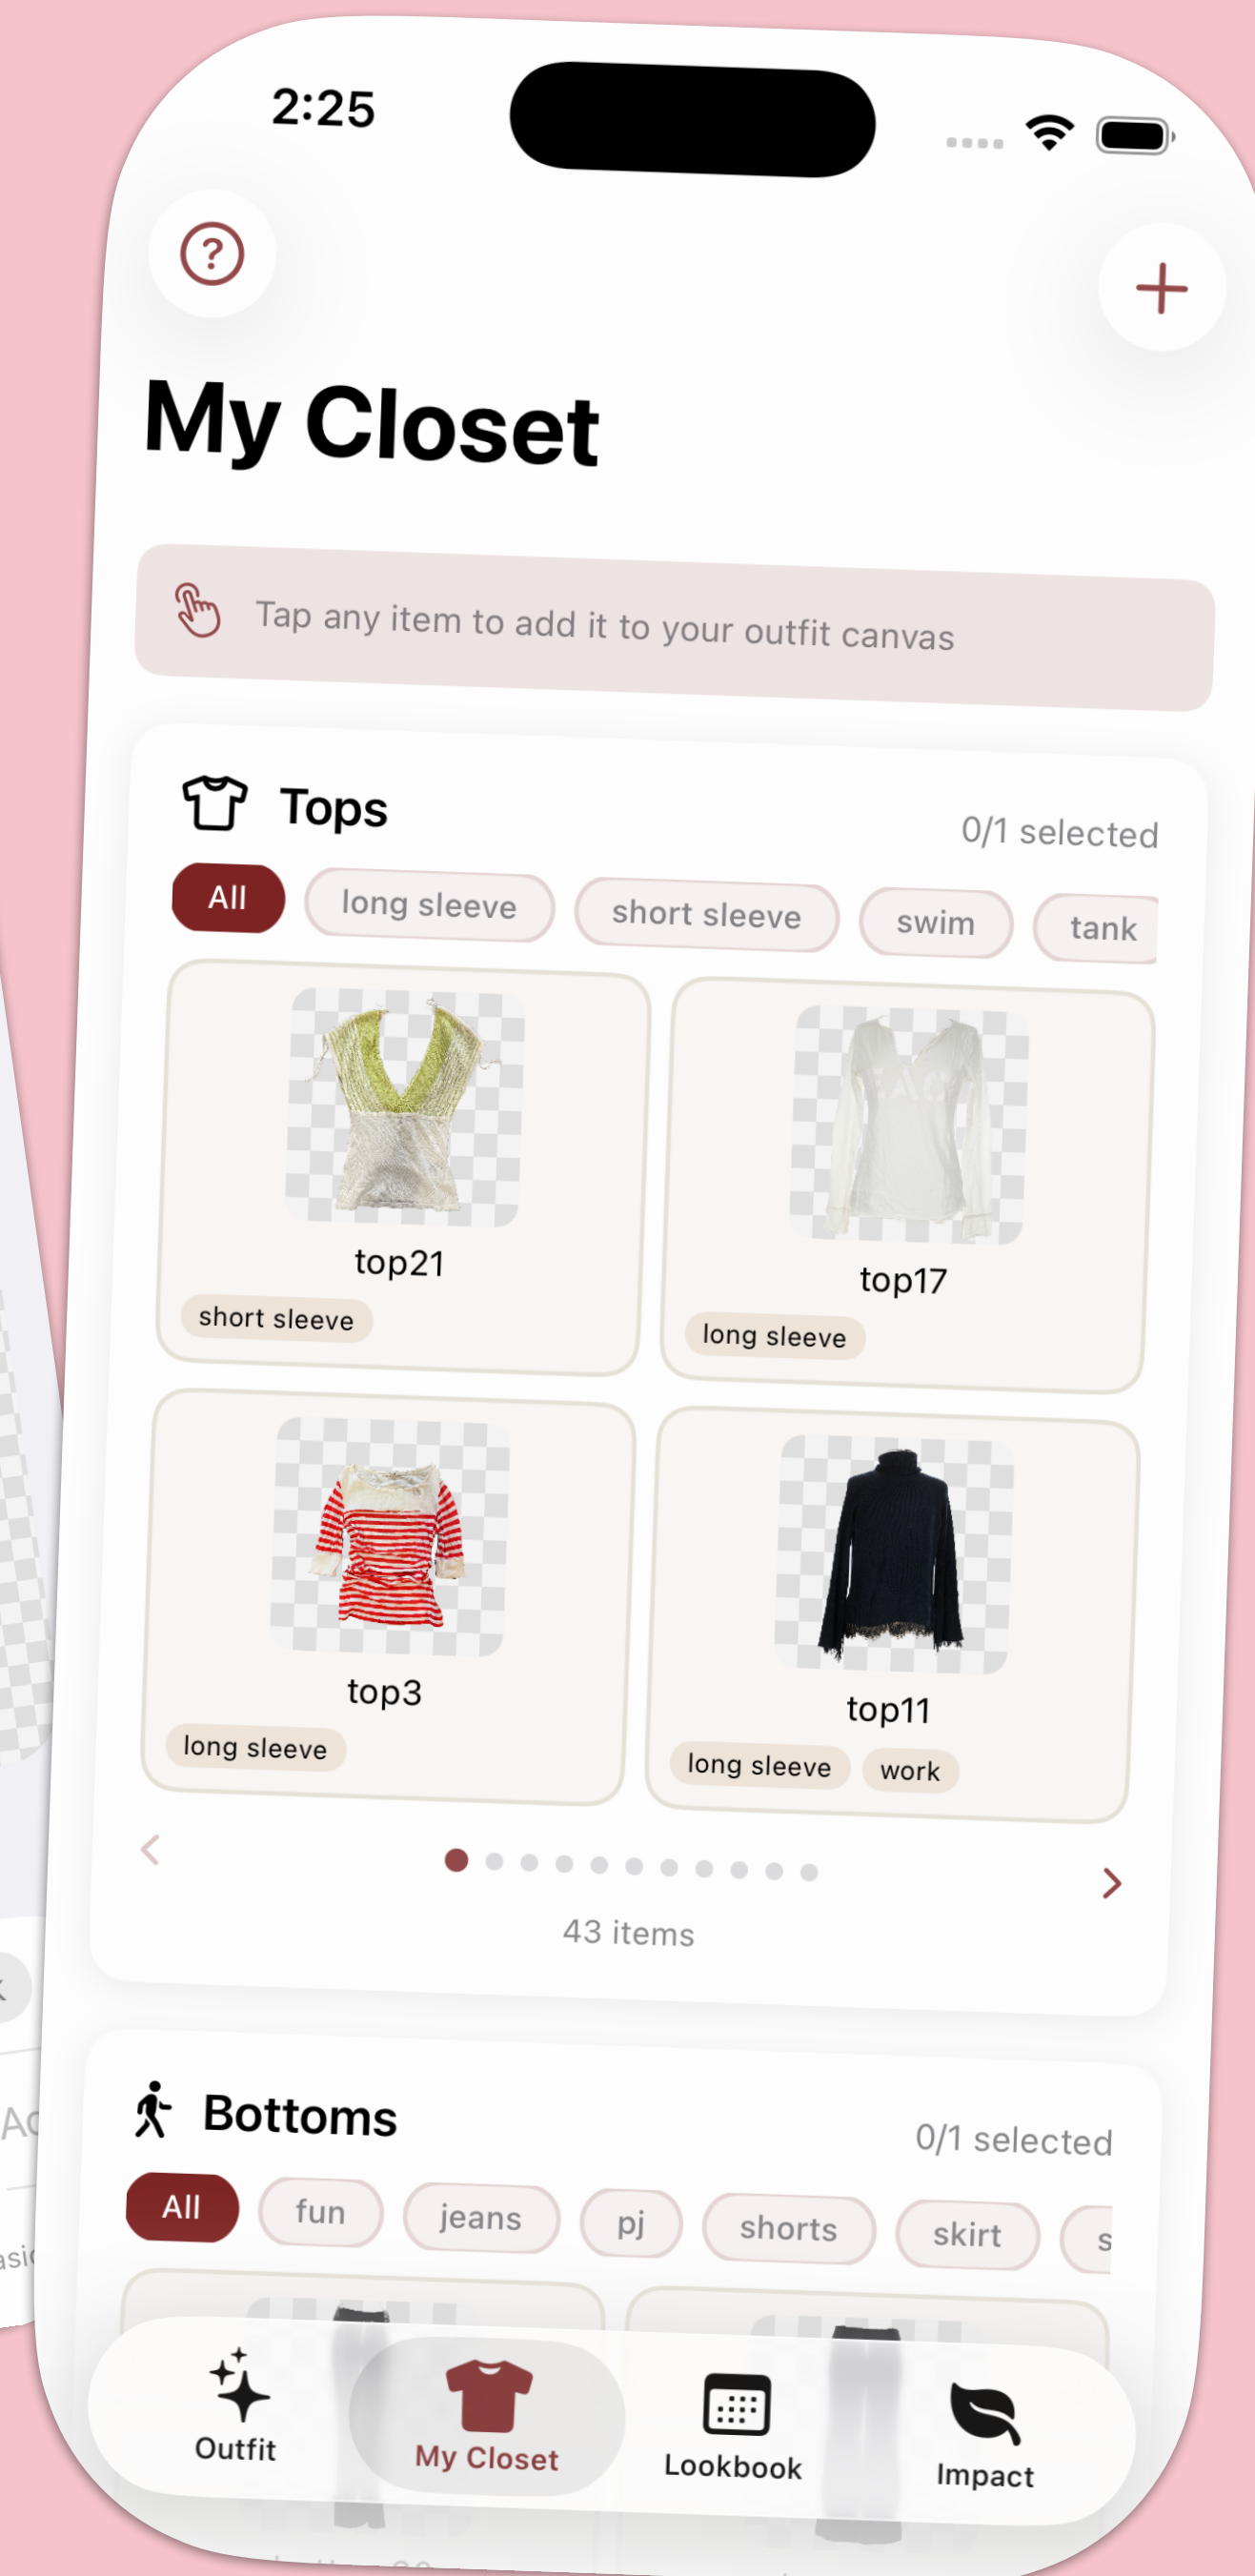

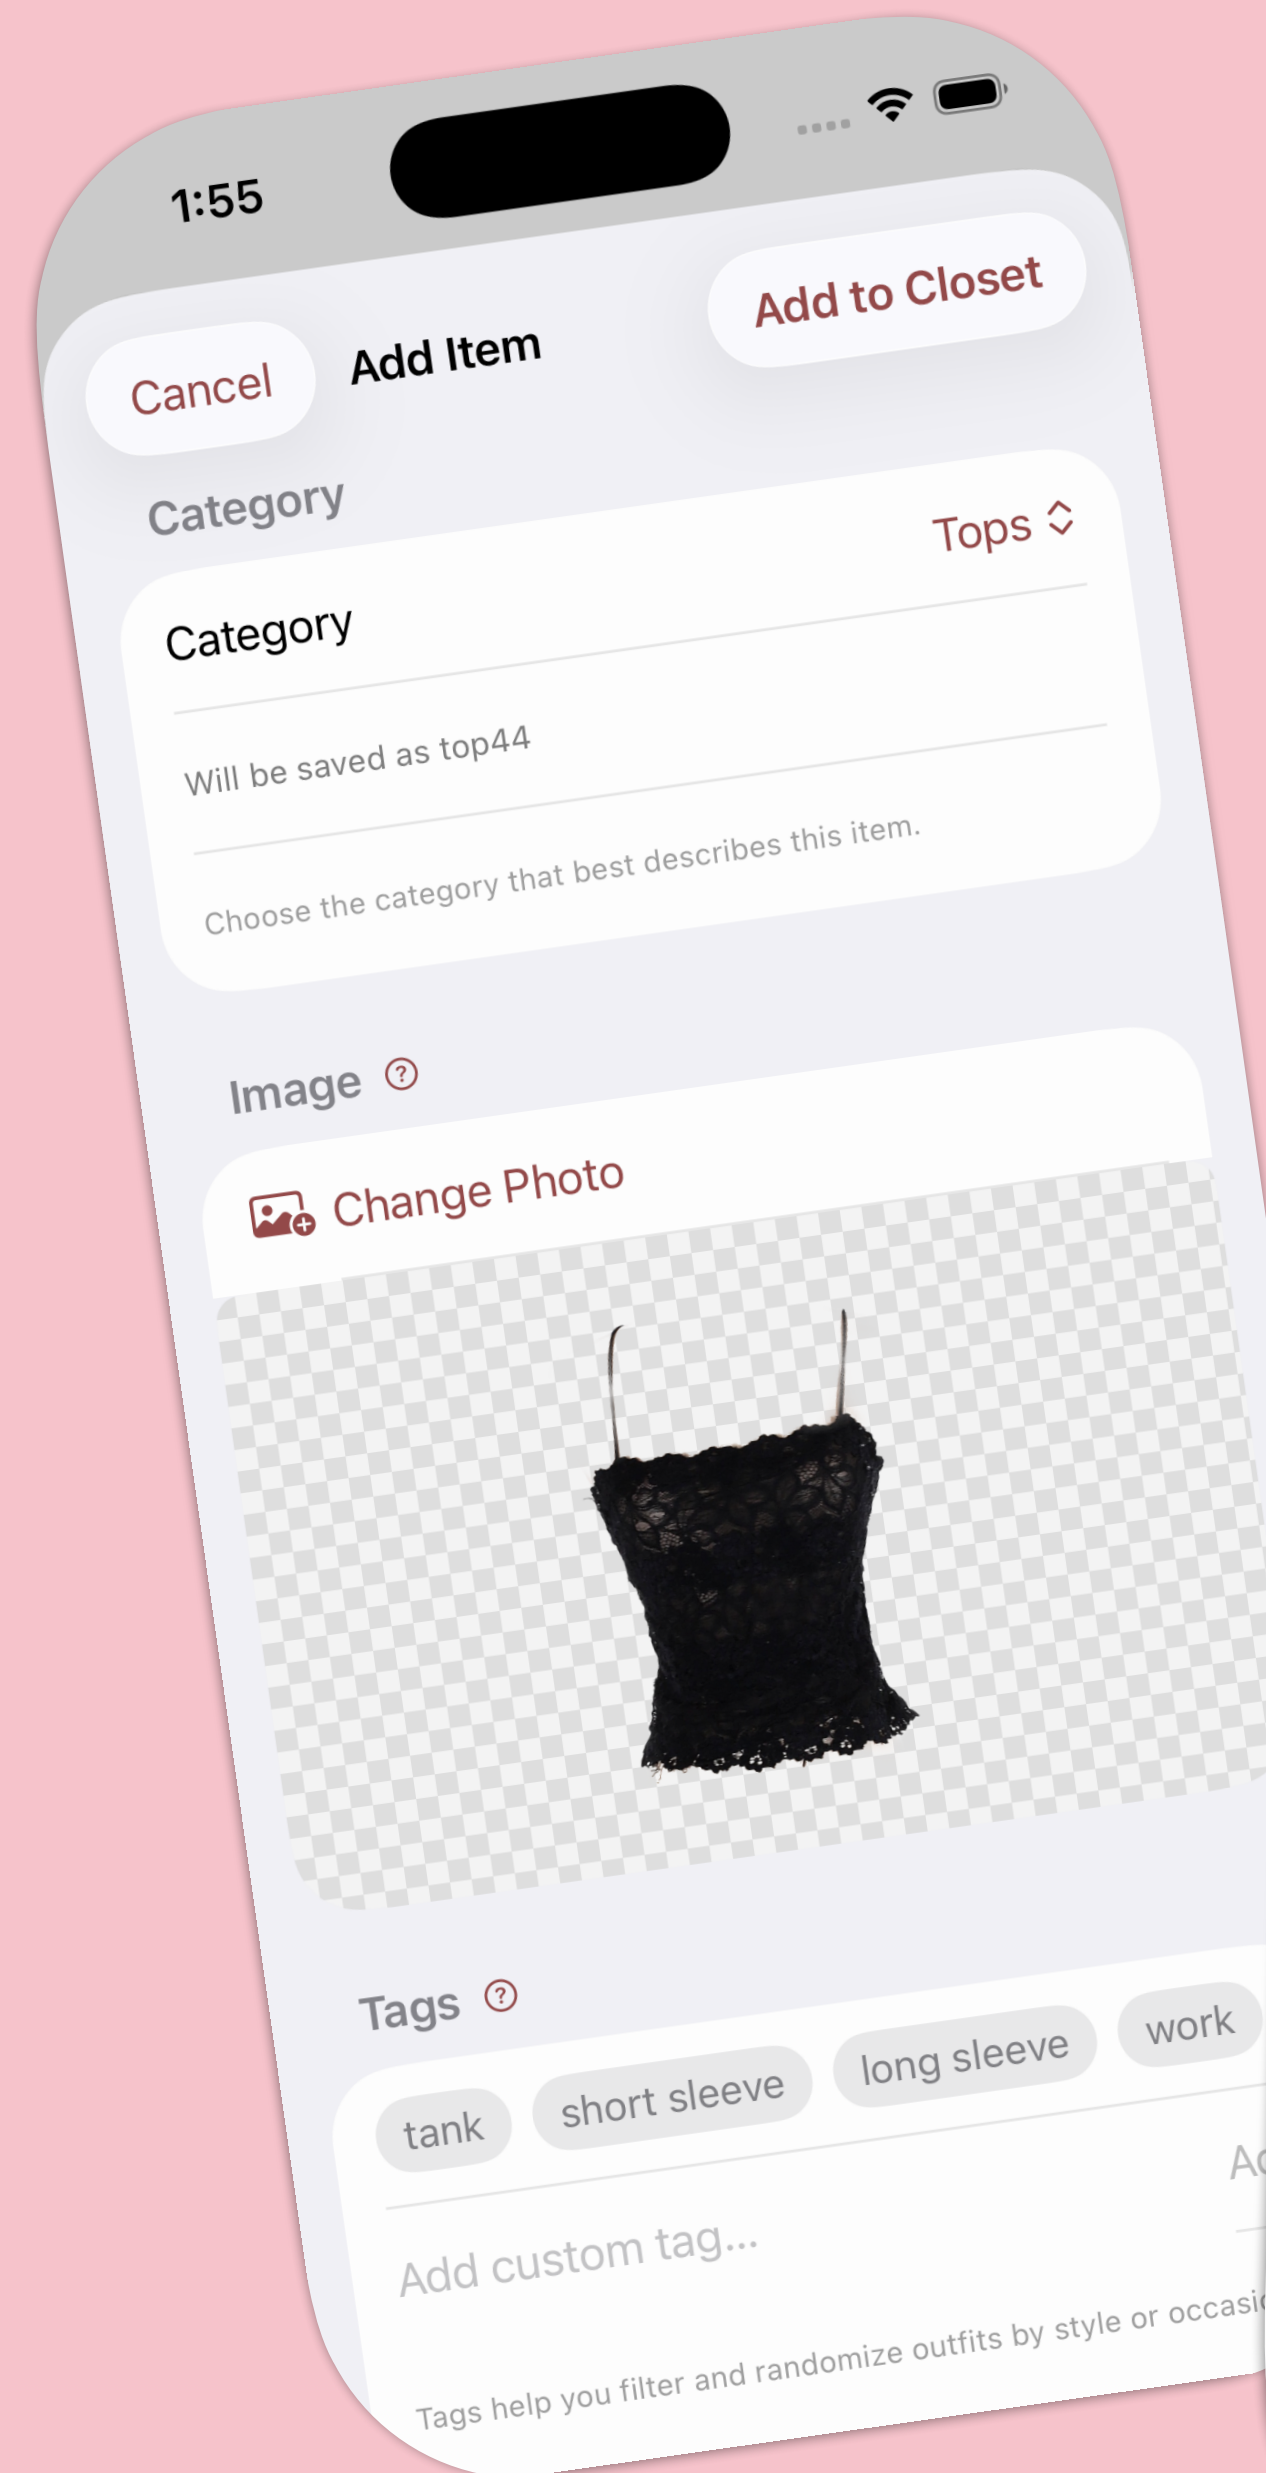

If we wore our clothes ***twice***
as much, we'd cut fashion's
carbon footprint by ***44%***.

HangOn is a digital closet that helps you *rediscover* and *visualize* what you *already own*.

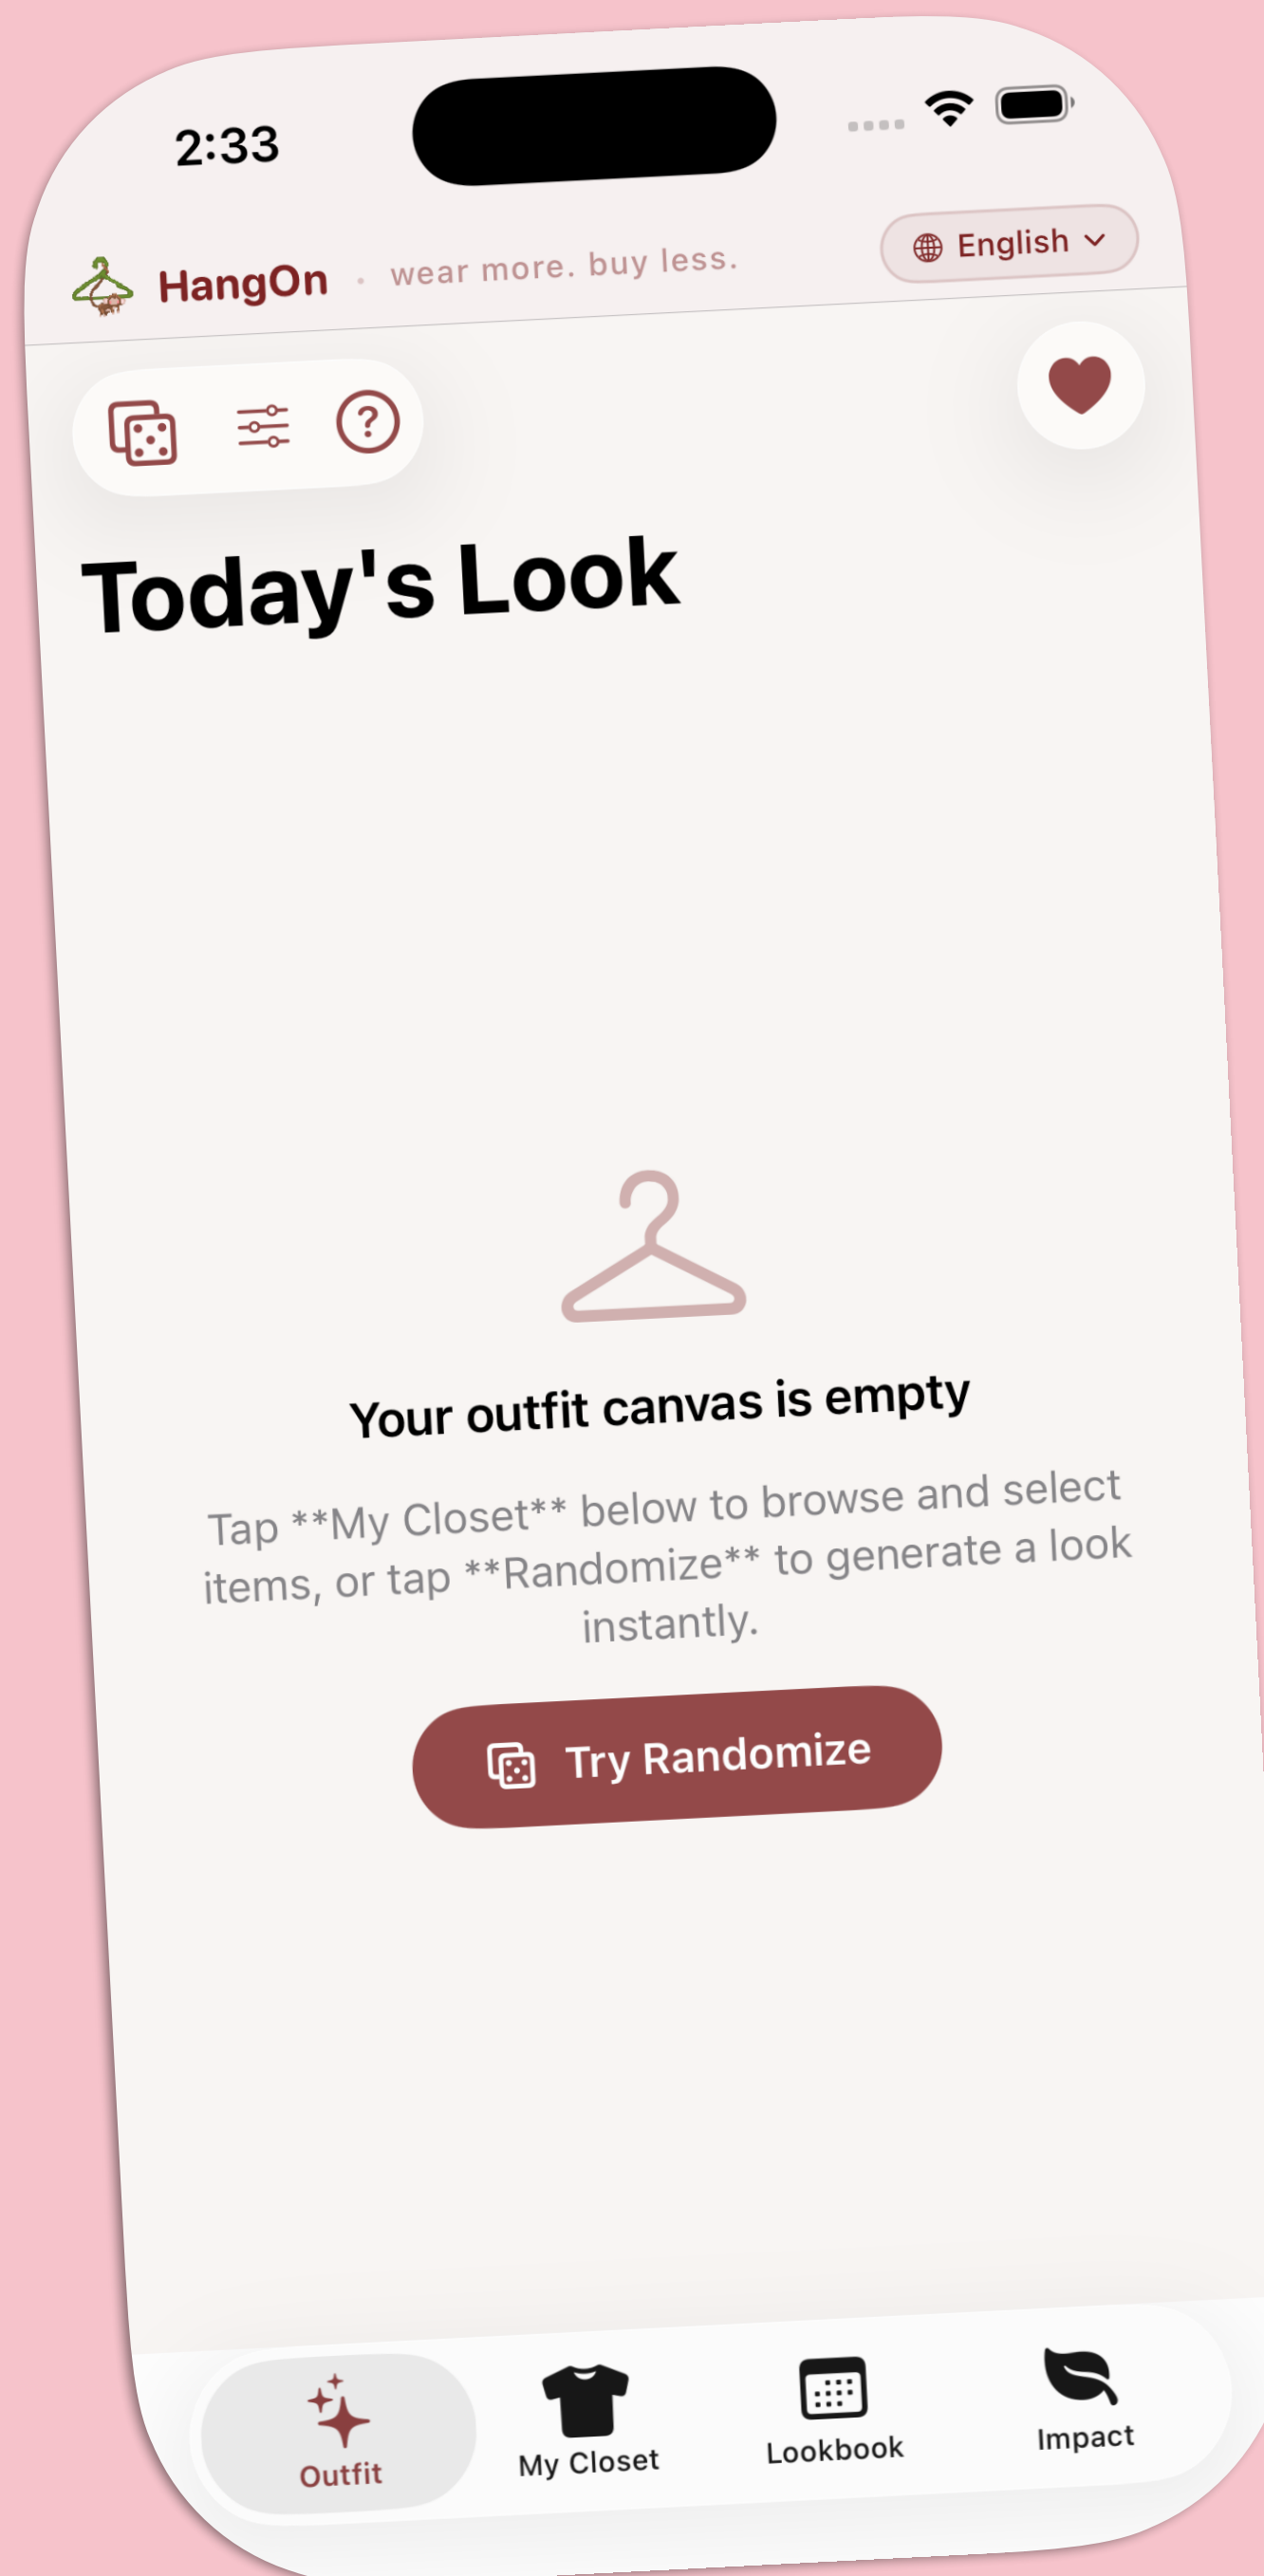

How it works

1. **Build Your Closet:**
Upload, categorize,
and tag what you own.

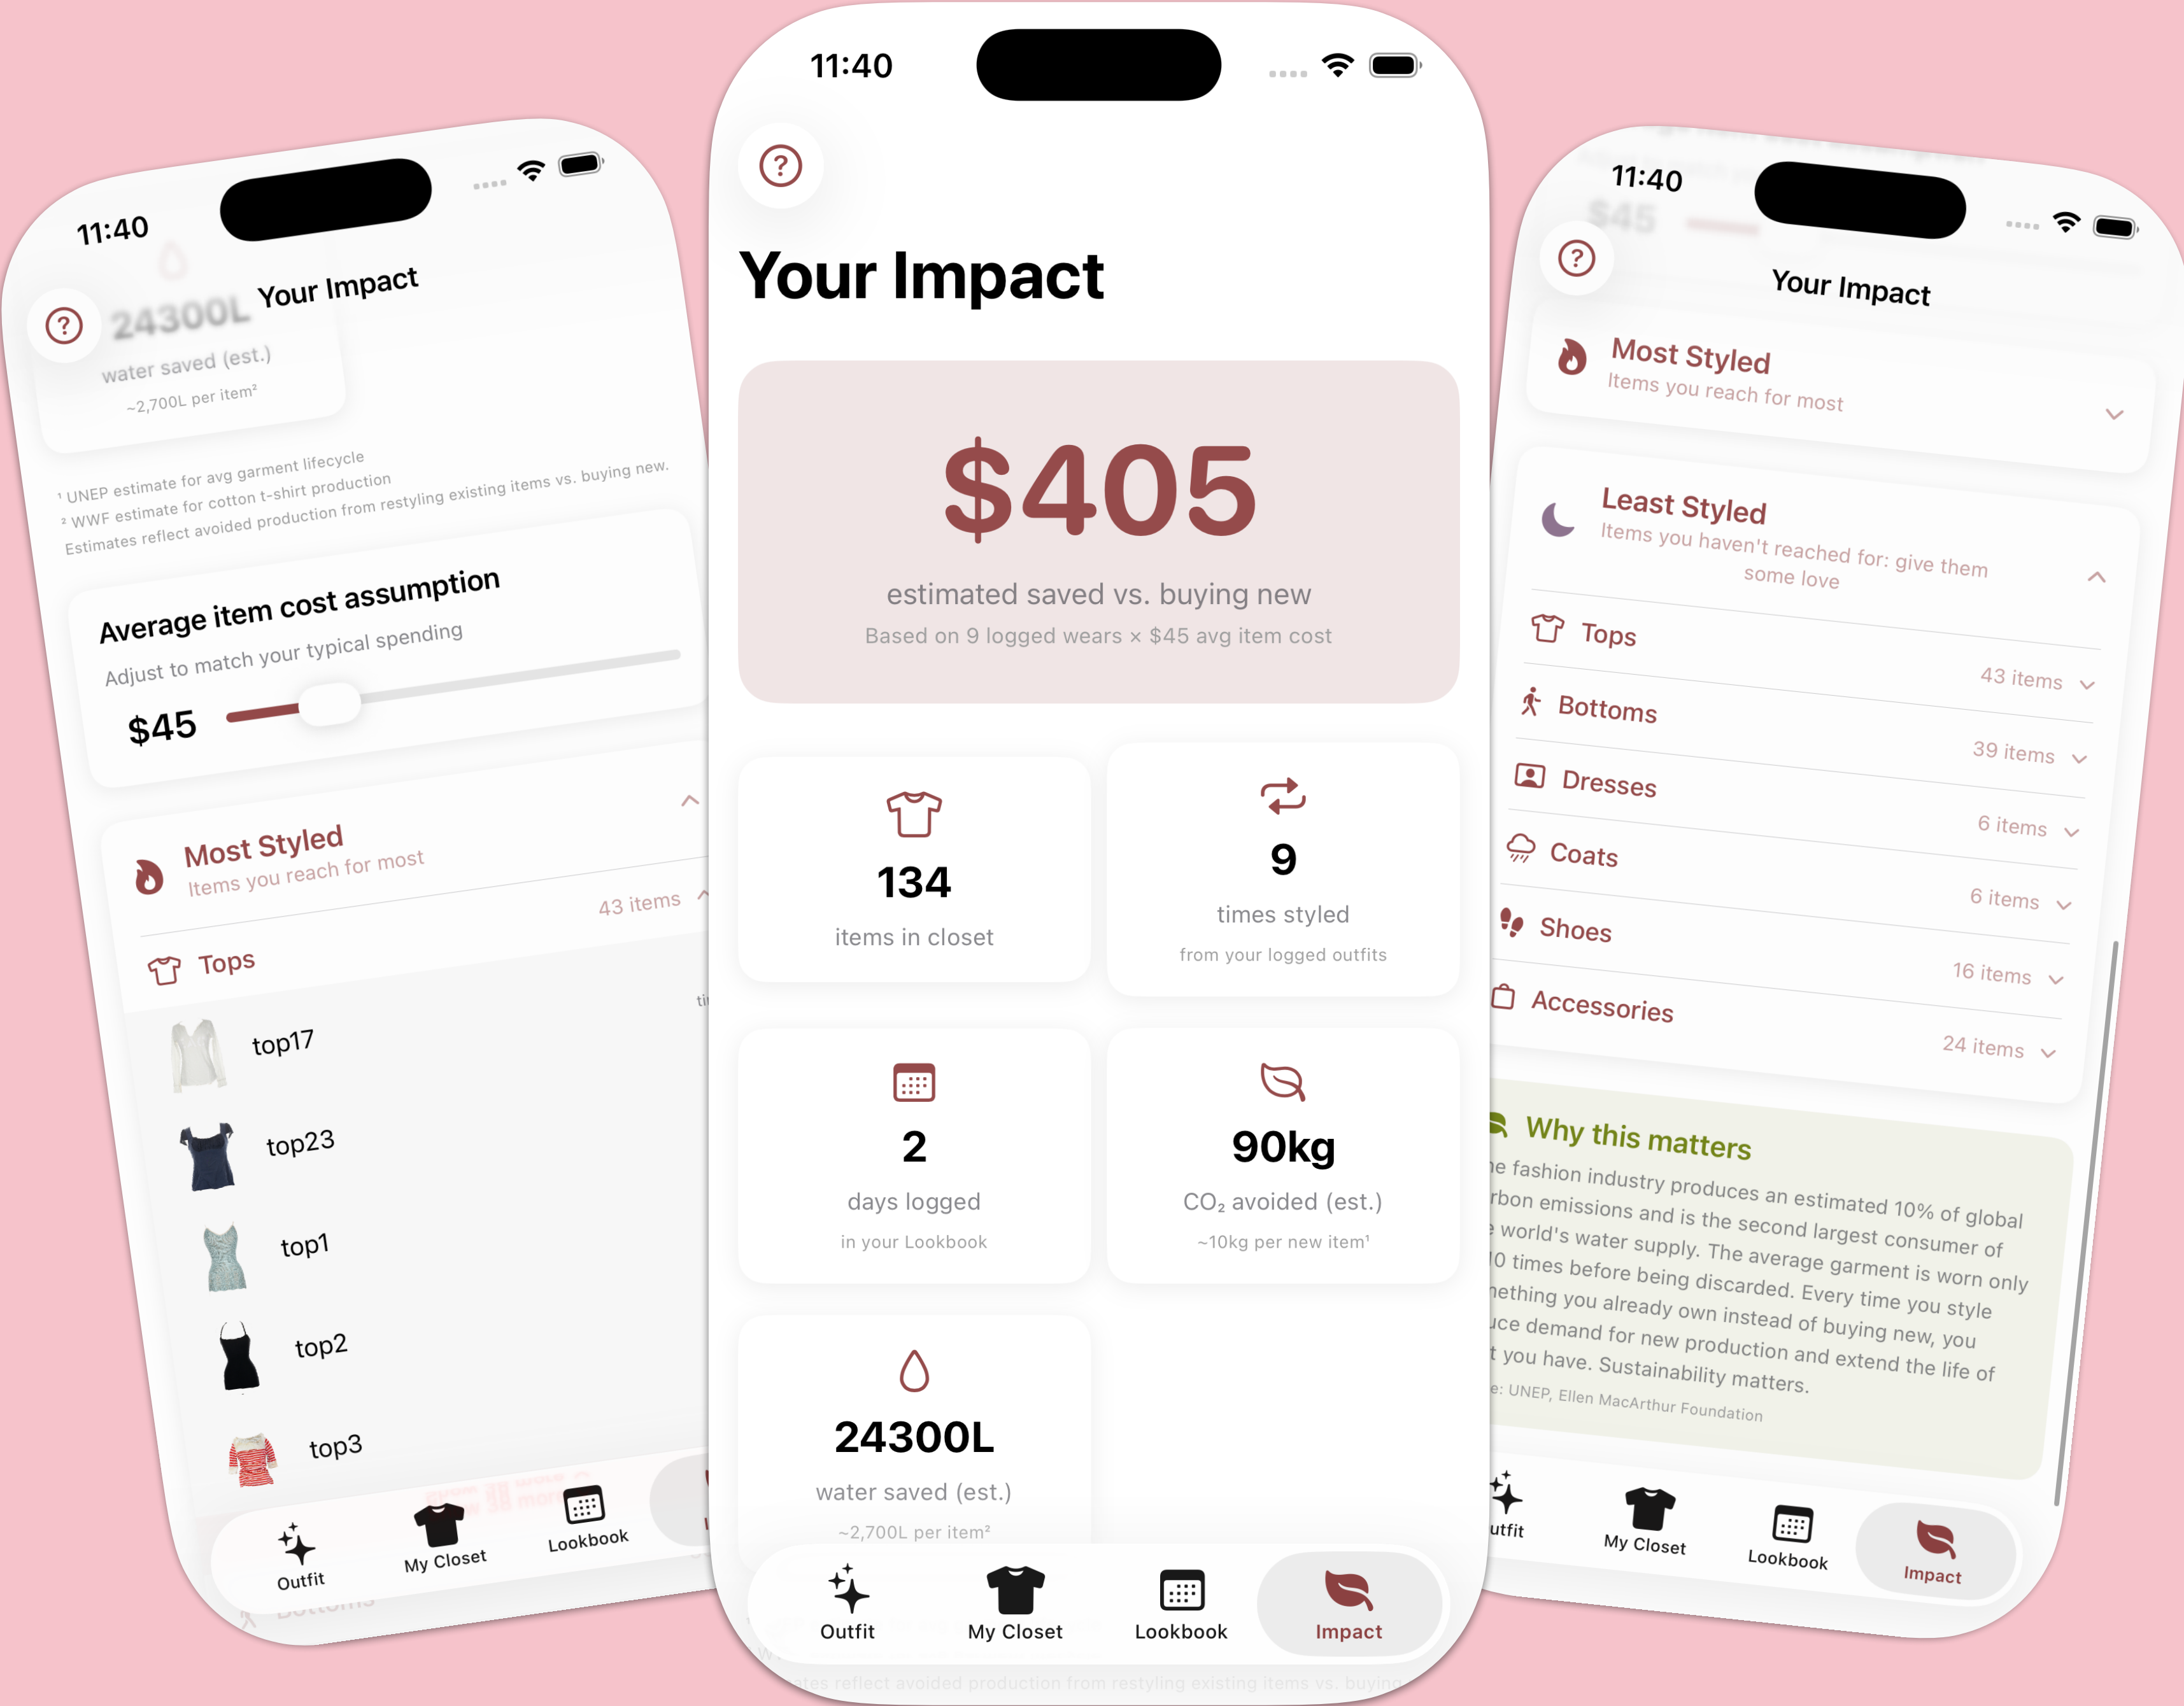

How it works

2. Create Outfits:
Mix and match, or let
Randomize style you.

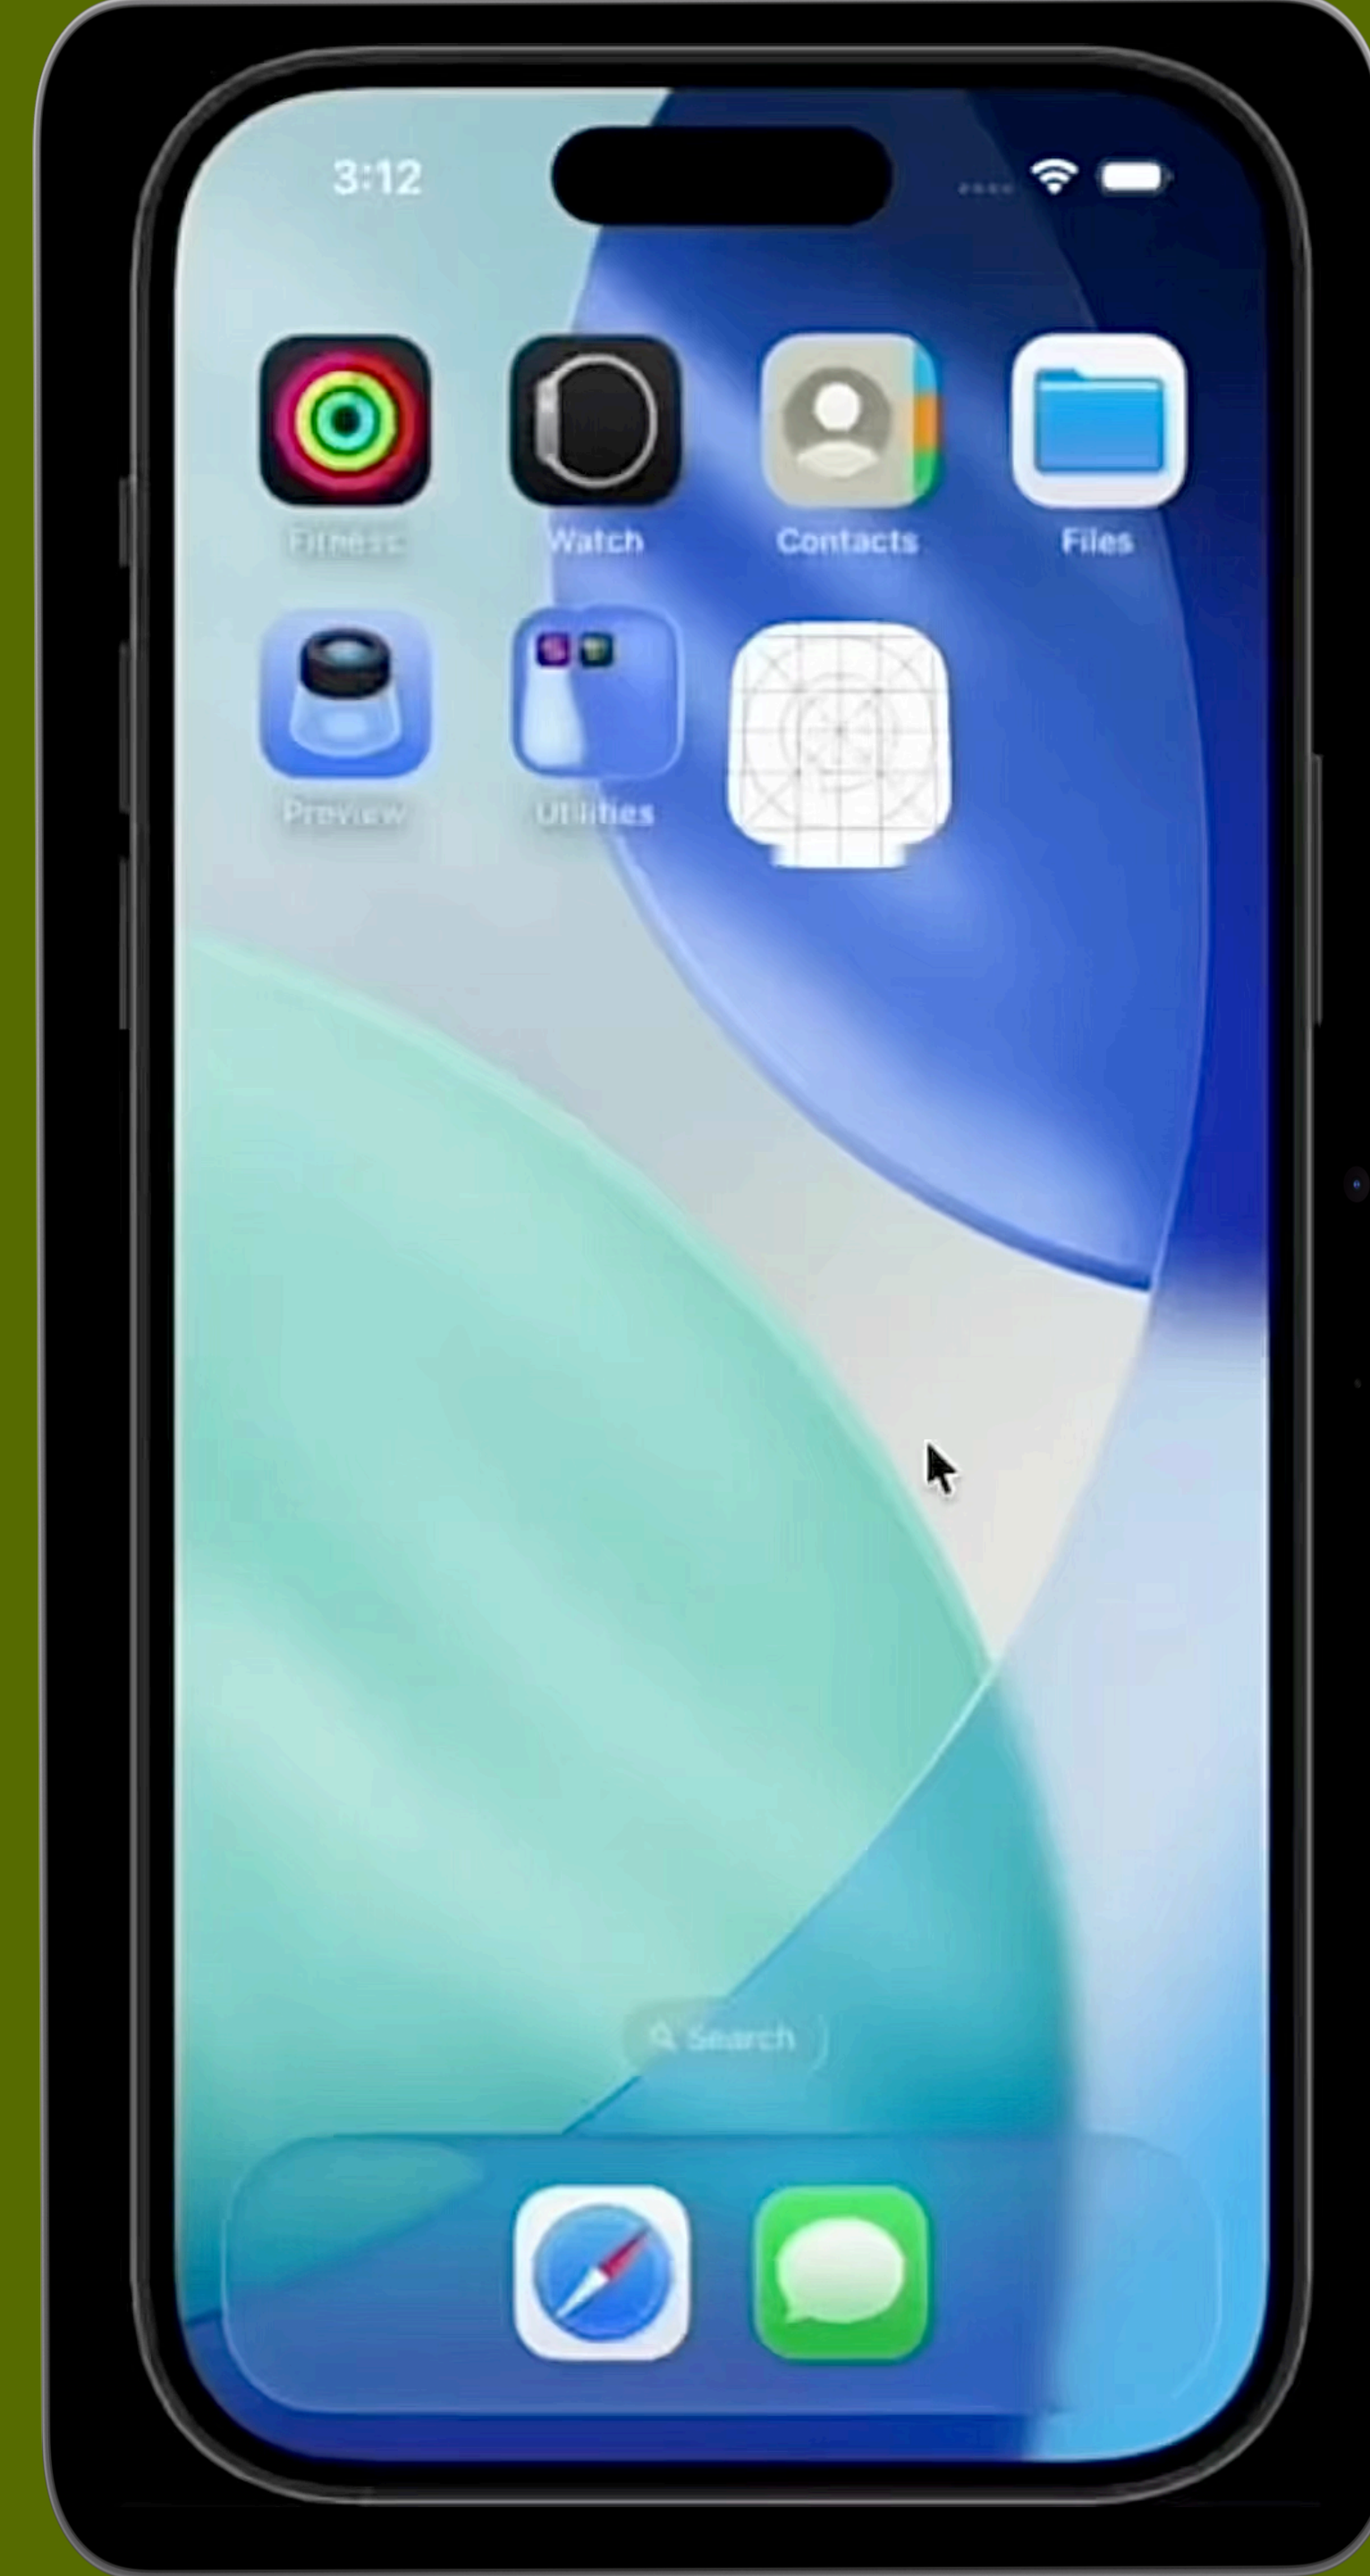

How it works

3. Track Your Impact: See the real savings, in real numbers.

```
@Observable
class WardrobeStore {
    var inventory: [Category: [ClothingItem]] = [...]
    var outfit: [Category: [ClothingItem]] = [...]
    var loggedOutfits: [LoggedOutfit] = [...]

    // Wear counts are DERIVED. Not stored, calculated live
    var wearCounts: [String: Int] {
        var counts: [String: Int] = [:]
        for log in loggedOutfits where log.date <= Date() {
            for item in log.items.values.flatMap({ $0 }) {
                counts[item.id.uuidString, default: 0] += 1
            }
        }
        return counts
    }
}
```

Challenges & Accomplishments

Challenge

Closet loading was slowing down user experience

Rethinking features that weren't so intuitive

Accomplishment

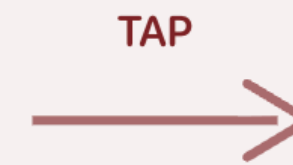

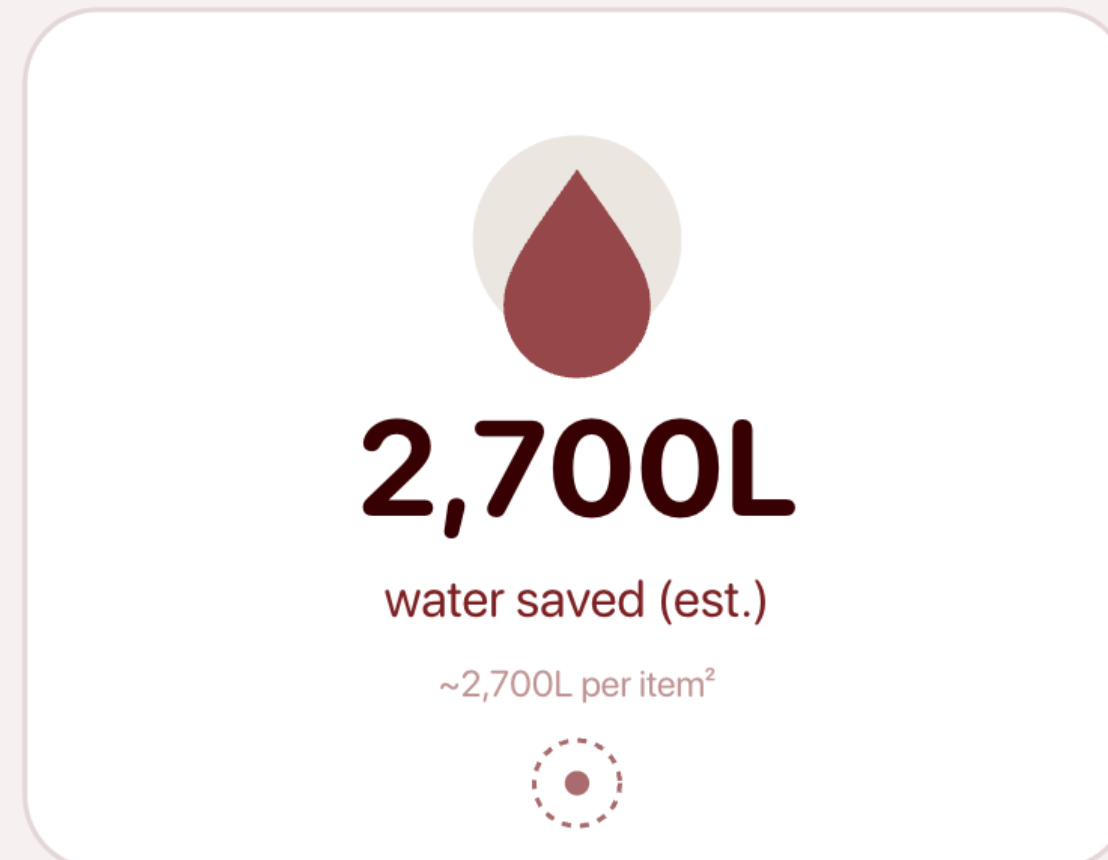

Fixed with a local-first cache and silent background sync

Having friends test the UI
